La Esperanza Clinic	San Angelo, TX
Sterling City Independent School District	Sterling City, TX
Sutton County	Sonora, TX

Alcohol & Drug Abuse Council for the Concho Valley

Project Information:

Project Summary	
Our project summary consists of implementing educational information to all populations in regard to SUD/ODD issues. We also look to provide trainings to the community to in address stigma and how to help those with SUD/ODD disorders.	
Focus Areas	
<ul style="list-style-type: none"> • Co-occurring Disorders • Community Behavioral Health • Mobile Healthcare Delivery • Peer Recovery • School-Based Care 	
Areas of Expertise	
Our organization's expertise is in the areas of prevention, treatment, outpatient, and recovery residency.	
Areas Where We Would Like to Serve as a Peer Mentor	
Our organization would like to serve as a peer mentor where SUD and OUD are prevalent to educate those in school, higher education, community drop-in centers, churches, etc.	
Areas Where We Would Welcome Technical Assistance	
We would welcome support in the areas that benefit most from these types of support systems.	
Target Population(s)	
Age:	Adolescents (13-17), Young Adult (18-24), Adult (25-64)
Race/Ethnicity:	White, Hispanic/Latino/Latinx, Black/African-American
Health Status:	People with/at risk for OUD or SUD, People with/at risk for co-occurring conditions as a result of SUD (e.g., cirrhosis, HIV, hepatitis), People in recovery from OUD/SUD, People living with disabilities, Substance-exposed children and infants, People with/at risk for co-occurring conditions (mental illness, eating disorders, etc.)
Health Access:	Uninsured or underinsured, Medicaid or Medicare recipients, Medically underserved
Economic:	Low-Income/Persons Living at or Near Poverty-Level, Unemployed Persons
Special Populations:	Racial and Ethnic Minorities, People Experiencing Homelessness, Pregnant and Parenting Women
Other:	Families of People With SUD/ODD

Organizational Information:

Project Title:	Wilkes Opioid Response Program - Psychostimulant Support
State:	North Carolina
Organization Type:	Community based organization
Website:	https://www.projectlazarus.org/
Address:	5368 NC Highway 16 S Moravian Falls, NC 28654

Grantee Primary Point of Contact:

Name:	Fred Brason
Email:	fbrason@projectlazarus.org
Phone:	336-667-8100

Target Service Area(s):

County, State
Wilkes County, NC

Consortium Members:

Organization Name	City, State
AIDS Leadership of the Foothills- Area Alliance	Hickory, NC
Coastlands Ministries DBA Project Lazarus	Moravian Falls, NC
Goodwill Industries of Northwest NC- Project Reentry	North Wilkesboro, NC
North Wilkesboro Comprehensive Treatment Center	North Wilkesboro, NC
Wilkes County Emergency Medical Services	North Wilkesboro, NC
Wilkes Recovery Revolutions, Inc.	North Wilkesboro, NC

Project Information:

Project Summary
Through the RCORP-Psychostimulant Support Program, the existing Wilkes Opioid Response Program consortium, serving now within COPE (Community Opioid Prevention and Education), will address social and environmental determinants within our community that have driven the prevalence of psychostimulant use/misuse disorder and its impacts on the community of Wilkes County, North Carolina, to a staggering degree. The consortium will work to increase engagement of individuals with psychostimulant use or misuse disorder in treatment and recovery support services, increase the capacity of community agencies and

providers to meaningfully and appropriately engage individuals who have psychostimulant use and misuse disorder, and create a community-wide prevention focused response to better address substance use disorder so that more individuals within the target population have access to treatment and recovery services. Through this process, the consortium has uncovered additional gaps and barriers for individuals with psychostimulant use/misuse disorder. This new funding opportunity will allow the consortium to begin addressing and effectively bridging those gaps.

Focus Areas

- Homeless Populations
- Peer Recovery
- Hub & Spoke Model

Areas of Expertise

Coastland Ministries dba Project Lazarus expertise are Peer Support Services, community coalition building, and linkage to care for its participants.

Areas Where We Would Like to Serve as a Peer Mentor

Coastlands Ministries dba Project Lazarus can serve as a peer mentor in the capacity of assistance with coalition building, direct Peer Support Services, resource development and linkage to care throughout the community.

Areas Where We Would Welcome Technical Assistance

Capacity building and provider education specific to psychostimulant use

Target Population(s)

General population

Sussex County Health Coalition	Georgetown, DE
Tabitha Medical Care	Laurel, DE

Project Information:

Project Summary

The Vision Consortium aims to strengthen and expand prevention, treatment, and recovery services in rural areas of Delaware by providing training, education, and support to the behavioral health workforce. The project seeks to enhance the ability of behavioral health professionals to provide effective evidence-based treatments and interventions to help move individuals towards recovery. The Vision Consortium is a multi-sectored group, which represents Re-Envisioning Prevention, Treatment, and Recovery Services. Each member agency represents an aspect of prevention, treatment, and recovery services, such as workforce education and training, behavioral health treatment provider, county-wide coordinating agency, prevention, and acute care service delivery. Specifically, the project aims to provide evidence-based prevention, treatment, and recovery activities over a three-year period to the youth, individuals, families, and the behavioral health workforce in rural areas of Sussex and Kent Counties by focusing on:

- Providing the evidence-based programming to youth and families at-risk for psychostimulant use disorders.
- Implementing screening and brief interventions in clinical settings to provide referrals to individuals at-risk for psychostimulant misuse, including those who have infectious complications.
- Recruiting, training, and mentoring members of the behavioral health workforce on motivational interviewing, and screening, brief interventions, and referral (SBIRT) through learning collaboratives.
- Enhancing discharge coordination for people in treatment and recovery of various cultural and ethnic backgrounds who require linkages to home and community-based social supports.
- Expanding peer workforce development by hosting a monthly learning collaborative focused on supporting and coaching peers on effectively working with individuals in treatment and recovery in various settings.

Focus Areas

- Community Behavioral Health
- Community Health Workers
- Peer Recovery

Areas of Expertise

- Resources and networking in Sussex County DE
- SUD
- Higher Education

Areas Where We Would Like to Serve as a Peer Mentor

- Peer support groups
- Referrals to peer mentors in areas of Sussex and Kent County

Areas Where We Would Welcome Technical Assistance

- Peer support resources already available in rural Delaware areas
- Hispanic and Haitian population resources

Target Population(s)	
Age:	Adolescents (13-17), Adult (25-64), Older Adult (65+)
Race/Ethnicity:	White, Hispanic/Latino/Latinx, Black/African-American, Tribal populations/Native American/American Indian/Alaska Native - Hastian
Health Status:	People with/at risk for OUD or SUD, People who inject drugs, People with/at risk for co-occurring conditions as a result of SUD (e.g., cirrhosis, HIV, hepatitis), People in recovery from OUD/SUD, Substance-exposed children and infants, People with/at risk for co-occurring conditions (mental illness, eating disorders, etc.)
Health Access:	Uninsured or underinsured, Medicaid or Medicare recipients, Medically underserved
Economic:	Low-Income/Persons Living at or Near Poverty-Level, Unemployed Persons
Special Populations:	Racial and Ethnic Minorities
Other:	Families of People With OUD/SUD, Healthcare Workers and Providers, Law Enforcement and First Responders, People With Low Health Literacy, Non-English Speakers

Coastal Plains Community Center (CPCC)	Portland, TX
Community Action Corporation of South Texas (CACOST)	Alice, TX
Feonix - Mobility Rising (FMR)	Corpus Christi, TX
United Connections Counseling, Inc (UCC)	Alice, TX

Project Information:

Project Summary

Together, the Coastal Plains Community Center (CPCC), Community Action Corporation of South Texas (CACOST), United Connections Counseling (UCC), and Feonix-Mobility Rising (FMR) have teamed up to enhance SUD/ODU services in the rural counties in the Coastal Bend of Texas, as well as break down barriers in connectivity between referral of services and the wheels to get there. In addition, as part of this proposal, faculty and experts in mobility, rural health, and substance use disorders from the Texas A&M University School of Public Health, Texas A&M Transportation Institute, and Warren Alpert Medical School of Brown University will meet quarterly with practitioners to share insights, ideas, and lessons learned in the field from across the United States in enhancing services and expanding access to SUD/ODU resources.

Focus Areas

- Community Health Workers
- Integration of Services
- Transportation
- Health Information Technology
- Hub & Spoke Model

Areas of Expertise

Rural transportation, coordination of care related to mobility, accessibility, mobility as a service, and volunteer drivers are major areas of expertise Feonix - Mobility Rising is able to support.

Areas Where We Would Like to Serve as a Peer Mentor

Transportation for clients and communities is an area where we have unique expertise in rural areas.

Areas Where We Would Welcome Technical Assistance

Data reporting is an area of interest, as this is our first HRSA grant and want to make sure we get it right.

Scott's Family Pharmacy, Inc.	Gibson City, IL
The Medicine Shoppe Pharmacy	Gibson City, IL
The Onarga Clinic	Onarga, IL
The Paxton Clinic	Paxton, IL

Project Information:

Project Summary

The focus of Psychostimulant Support Services for East Central Illinois is to address the following areas:

1. Co-occurring disorders (COD), including opioid plus methamphetamines, cocaine, and ecstasy
2. The reduction of harm to those afflicted with COD and their families/caregivers.
3. Co-occurring physical comorbidities associated with those with psychostimulant disorder. Those individuals who have a history of, or who are at risk for, SUD/OD and other psychostimulants disorders, and those who present with mental illness issues co-occurring with psychostimulant disorders will be the focus group of this Project.

There are many urban-rural differences that contribute to these problems. For example, there may be a lack of emergency naloxone devices in rural markets and travel time can be significantly higher for first responders to reach individuals needing help. There are typically

Gibson Area Hospital & Health Services

fewer substance abuse treatment providers and facilities in rural communities, which is the case in this service area. Many rural communities have socio-demographic vulnerabilities [and in the case of this service area many other social determinants of health] that are contributing factors to the opioid crisis. Rural communities are typically tight knit therefore, stigma is both an obstacle and a challenge. Stigma often prevents struggling individuals from seeking help and healthcare providers from integrating treatment into their practices. Stigma may be the obstacle that hinders a community’s capacity to address the opioid epidemic. These issues are compounded many times over because of a lack of familial support, poverty, and the overarching addiction related issues. This nation-wide public health crisis has been elevated to emergency status.

Focus Areas

- Co-occurring Disorders
- Peer Recovery
- School-Based Care
- Community Behavioral Health
- Integration of Services
- MOUD/MAT Implementation
- Neonatal Abstinence Syndrome

Areas of Expertise

Katherine Austman, MD is a huge asset to the rural area of East Central Illinois. Dr. Austman is a practicing family medicine provider under the GAHHS umbrella and has completed a Fellowship in Addiction Medicine from St. Louis University (2020). The St. Louis University fellowship program is one of the first fellowships in Addiction Medicine certified by the American College of Graduate Medical Education. Dr. Austman was the first fellow enrolled in the St. Louis University program. Fellows’ complete rotations at SSM Health Saint Louis University Hospital and SSM Health St. Mary’s Hospital, as well as in clinics and community health centers. Fellows also work at the WISH Center. WISH treats women with addiction issues throughout their pregnancies and the post-partum period. Under her leadership and through her expertise in this area she is making great strides within the community and with her fellow providers, by helping them understand the nuances of treating those suffering with SUD/ODs. Her guidance is extremely valuable to the ultimate success of this Project.

Areas Where We Would Like to Serve as a Peer Mentor

Formation of coalitions in rural communities/counties.

Areas Where We Would Welcome Technical Assistance

Stigma education for community.

Target Population(s)

General population

Organizational Information:

Project Title:	Strengthening Prevention, Treatment and Recovery for Individuals who Misuse Psychostimulants in Northwest Pennsylvania
State:	Pennsylvania
Organization Type:	Community based organization
Website:	https://recoveryisnwpa.org/recovery-is-community
Address:	201 State Street Erie, PA 16550-0001

Grantee Primary Point of Contact:

Name:	Mandy Fauble
Email:	faublem2@upmc.edu
Phone:	814-451-2225

Target Service Area(s):

County, State	
Crawford County, PA	Venango County, PA
Erie County, PA	

Consortium Members:

Organization Name	City, State
Crawford County Drug & Alcohol Executive Commission	Meadville, PA
Hamot Health Foundation	Erie, PA
UPMC Western Behavioral Health at Safe Harbor	Erie, PA
Venango County Human Services	Franklin, PA

Project Information:

Project Summary
Northwest Pennsylvania resources for strengthening prevention, treatment, recovery and support of individuals, particularly women and families impacted by a variety of substance use disorders, are being woven into a more comprehensive and cooperative system throughout rural Erie County, Crawford County, and Venango County in Northwest Pennsylvania (NWP) through our successful consortium work over the past three years. The Rural Communities Opioid Response Program Psychostimulant Support grant will help support education, training, and treatment for individuals who misuse psychostimulants in NWP, to reduce the impacts of opioid use disorder as well as other substance use disorders on women and families in NWP. This project will expand on the lessons our key consortium members have learned as well as

build upon existing infrastructure for a successful deployment of activities accelerating a focus on individuals and families impacted by psychostimulant use. Our experienced consortium will focus on core prevention strategies, broad-based education and training throughout the rural area, treatment and recovery, discharge coordination and peer support. The overarching goal is the prevention and reduction of psychostimulant misuse through evidence-based prevention, treatment and recovery strategies targeted to behavioral health professionals, and the community at large. We will implement these initiatives with our rural community and the members of our consortium.

Focus Areas

- Community Behavioral Health

Areas of Expertise

- Care and support of substance-impacted women and infants
- Naloxone education and distribution
- Training series for behavioral health workforce

Areas Where We Would Like to Serve as a Peer Mentor

- Providing training content on SBIRT
- Compassion Fatigue
- Differential Diagnoses of ADD/ADHD

Areas Where We Would Welcome Technical Assistance

Guidance on accessing and distributing fentanyl test strips in our grant areas, which were recently legalized in our state.

Target Population(s)

Pinal Hispanic Council (PHC)	Nogales, AZ
Southeast Arizona Area Health Education Center (SEAHEC)	Nogales, AZ

Project Information:

Project Summary

Santa Cruz County Overcoming Addiction (SOSA) is a cross-sector consortium that convened in 2019 with the goal of collaborating to increase the availability of, and access to, culturally and linguistically appropriate services to prevent, treat, and recover from substance use disorder (SUD) and especially opioid use disorder (OUD). SOSA currently has 15 members representing primary care, emergency care, behavioral health, emergency medical services, law enforcement, k-12 schools, higher education, and workforce development. Mariposa Community Health Center (MCHC) is a federally qualified health center established in 1980 to meet the needs of the rural, low income, Hispanic/Latino population of Santa Cruz County. MCHC is the lead agency and fiscal agent for funding that supports SOSA through the HRSA Rural Communities Opioid Response Program (RCORP). MCHC is currently the applicant for a RCORP-Psychostimulant Support funding opportunity to address the prevalence and impact of methamphetamines and cocaine use in the community. Six key consortium partners from the primary care, behavioral health, and workforce development sectors are charged with leading these efforts. Santa Cruz County is the smallest county in Arizona, with a population of 48,724. Almost half of county residents live in Nogales, the international port of entry. This proximity to the Mexico border means that county residents have access to Mexican pharmacies, where policies and procedures differ from county and U.S. practices. It also means the county experiences heavy illegal drug trafficking. According to the U.S. Drug Enforcement Administration’s National Seizure System, among the top ten drug types seized in 2020, eight were opioids and methamphetamines – a total of 922 seizures. In 2019 and 2020, 87% of overdose cases involved opioids and 37% involved psycho stimulants (methamphetamine and cocaine). Sixty-five percent involved two or more drugs. Among cases involving psychostimulants, all but one (94%) involved two or more drugs. Santa Cruz County is a HRSA designated Health Professional Shortage Area (HPSA) and there are major gaps in services for county residents: there are no in-patient treatment facilities, homeless shelters are limited, no transitional housing programs, or domestic violence shelters. The overarching objectives for the three-year RCORP-PS project period are: 1) Expand SOSA prevention strategies and activities to address methamphetamines and cocaine, 2) Expand SOSA treatment and recovery strategies and activities to address methamphetamines and cocaine, 3) Formalize a SOSA data monitoring team to share SUD prevalence, caseloads, and overdoses in Santa Cruz County, and 4) Integrate psychostimulant use/misuse into SOSA sustainability work focused on SUD-OUD prevention, treatment, and recovery.

Project Information:

Project Summary

The Supported and Safe Project aims to create, foster, and sustain working environments that promote healthy lifestyle choices and abstinence from psychostimulant use. To achieve this goal, we are partnering with three manufacturing sites in Marshall County to encourage participation in programming that will engage associates and their family members in seeking treatment for psychostimulant use in a stigma free, supported, and safe environment. Participation is completely voluntary and confidential. Associates choosing to participate in Supported and Safe services will be given incentives. To create program sustainability Champions and Mentors within each work site will be identified and those individuals will receive incentives as well.

Focus Areas

- Community Behavioral Health
- Community Health Workers
- Emergency Medical Services

Areas of Expertise

- Substance Use Counseling
- Case Management
- Assessment

Areas Where We Would Welcome Technical Assistance

Areas we would welcome technical assistance would be in helping to reduce stigma around entering SUD treatment and ways to engage or get individuals motivated to participate in programming and then to stay engaged in treatment/programming.

Target Population(s)

Age:	Young Adult (18-24), Adult (25-64), Older Adult (65+)
Health Status:	People with/at risk for OUD or SUD, People with/at risk for co-occurring conditions as a result of SUD (e.g., cirrhosis, HIV, hepatitis), People in recovery from OUD/SUD
Health Access:	Uninsured or underinsured, Medicaid or Medicare recipients
Special Populations:	Justice-Involved/Incarcerated Persons
Other:	Families of People With SUD/OUD

Project Information:

Project Summary
Project PAGE (Psychostimulant Activities Guiding Education) provides the opportunity to leverage partnerships and learnings from NOVEL, as well as expand outreach and substance use focus across multiple counties. The project will focus its prevention efforts on increasing provider and community knowledge of psychostimulant misuse and use disorders and the dangers of stigma, as well as increasing screening efforts for individuals at risk for, or who have, psychostimulant use disorders. Treatment and recovery efforts will focus on workforce training, enhanced discharge coordination for people leaving treatment facilities and/or the

criminal justice system, and an expanded peer and recovery coach workforce. Through this work, Project PAGE will continue to enhance its infrastructure to implement policy, systems, and environmental change for long-lasting impact in the fight against psychostimulant misuse and use disorders.

Pacific Institute for Research and Evaluation	Columbus, OH
Sandusky County Health Department	Fremont, OH

Project Information:

Project Summary

The Community of Practice Response to Psychostimulants in Fairfield County (OH) will continue a highly innovative approach that empowers high-risk rural Ohio communities to work together to address psychostimulant use across the full continuum of care (prevention, treatment, and recovery). As an extension of previous RCORP-Planning and RCORP-Implementation awards, this project will support the PART (Prevention, Advocacy, Recovery, and Treatment) Coalition in implementing all six core activities associated with the RCORP-Psychostimulant Support initiative. The goals of the project are to:

1. Increase access to and engagement in evidence-based prevention, early intervention, treatment and recovery services for psychostimulant misuse;
2. Increase coordination and collaboration between organizations providing psychostimulant disorder and other SUD services;
3. Reduce health disparities and ensure equitable access to psychostimulant services; and
4. Leverage local, state, and federal resources to support implementation of activities, strategies, and programs to address psychostimulant misuse.

A key focus of project is on sustaining the local consortia and core activities beyond the project period and leveraging additional federal, state, and local funding streams. Through a community of practice approach, Ohio University’s Voinovich School of Leadership and Public Service will support the local consortia with wrap-around training, technical assistance, and evaluation services to ensure the project’s goals are met through a work plan that prioritizes equity and sustainability.

Project Information:

Project Summary

The overarching goal of the NCWR Psychostimulant Support Project is to strengthen and expand prevention, treatment, and recovery (PTR) services for rural individuals who misuse methamphetamines in order to increase their ability to access treatment and move towards recovery. The target populations include individuals who are at risk for, have been diagnosed with, and/or are in treatment and/or recovery for psychostimulant use disorder their families and/or caregivers and other community members who reside in three rural counties: Mayes, McIntosh, and Muskogee. The needs of the targeted populations were identified by researching the health disparities and SUD/psychostimulant-related issues facing each community. The NCWR leadership and staff work with SUD/OD coalitions, task forces, and providers across the state to identify and isolate SUD/OD "hot spots" and begin to build community around solving the issues facing thousands of rural Oklahomans each day. The NCWR will work with existing community-based SUD prevention coalitions in these hardest hit areas by strengthening and expanding PTR services for rural individuals who misuse psychostimulants. According to the Oklahoma State Department of Health (OSDH), Mayes County had the 6th highest death rate in the state for unintentional poisonings from drug overdose McIntosh County had the 5th highest death rate in the state and Muskogee County held the highest death rate in the state (OSDH, 2020).

Virginia Rural Health Association	Blacksburg, VA

Project Information:

Project Summary

Established in 2003, One Care of Southwest Virginia (One Care) is a consortium of community leaders dedicated to reducing overdoses and harm associated with substance use disorder (SUD) in the 18 counties and 4 independent cities of their rural Appalachian service area, 15 of which are classified as fully rural. Known for utilizing a collaborative, region-wide approach, the coalition presently includes representation from all health districts and behavioral health authorities in Southwest Virginia, as well as a diverse array of individuals from the social services, health care, higher education, law enforcement, faith-based, and recovery communities. Since its inception, One Care has partnered with a number of local agencies to provide targeted expansions of SUD/OD services and resources throughout the region. After the Virginia State Health Commissioner declared the opioid addiction crisis a public health emergency in Virginia, One Care successfully applied for an RCORP-Planning grant to conduct a comprehensive strategic planning process and identify potential approaches to alleviate the burden of SUD and OUD in local communities. While opioids were the focus for the planning grant, the need to address the abuse of additional substances, particularly methamphetamine, was brought up by several stakeholders and behavioral health professionals. In 2020, One Care used this feedback and the planning completed in the FY18 RCORP-P award to successfully obtain a 5-year SAMHSA Strategic Prevention Framework (PFS) grant to tackle opioid and methamphetamine use in SWVA Virginia. One Care wishes to build upon the successes of the initial RCORP-P grant while complementing the current prevention work of the PFS award by establishing the Psychostimulant Response Network (PRN). For the PRN, One Care has coalesced around a goal of achieving significant reductions in substance abuse and related social, economic, and health factors throughout the Southwest Virginia service area, with a particular emphasis on methamphetamine.

Project Information:

Project Summary
<p>The goal of this initiative is to reduce the morbidity and mortality of SUD/ODU, particularly related to psychostimulant misuse, in high-risk rural communities by strengthening and expanding prevention, treatment and recovery services. OCO will work closely with the other members of the Oswego County Opioid Response Consortium to complete the core activities in order to enhance individuals' ability to access prevention, treatment, and recovery services. The Oswego County Opioid Response Consortium was formed as part of the RCORP Planning III grant and membership has grown to include a diverse group of stakeholders dedicated to improving the health of Oswego County residents. Strategies for these improvements include a social media marketing campaign to reduce the stigma of SUD/ODU,</p>

increased naloxone training and distribution, implementing evidence based programming for youth age 18-24, educating the community and providers on SUD/ODU, increasing trainings for providers, increased screening for SUD/ODU, and a peer workforce marketing campaign.

Lake County Behavioral Health (North Shore)	Lucerne, CA
Lake County Behavioral Health (South Shore)	Clearlake, CA
Redwood Community Services, Inc.	Lakeport, CA

Project Information:

Project Summary
The Safe Communities Coalition will focus on serving individuals who are at risk for, have been diagnosed with, or are in treatment and/or recovery for psychostimulant disorders, their families or caregivers, and chronically marginalized and underserved populations, including but not limited to: racial and ethnic minorities, low-income populations, pregnant women, transition-age youth, and people experiencing homelessness. The Safe Communities consortium will expand the Safe Rx coalition to include a focus on education, prevention, intervention, treatment, and recovery of the most prevalent psychostimulant substance use

issue in Lake County, methamphetamine. In addition, the Safe Communities coalition will provide harm reduction and trauma-informed trainings to educate stakeholders expand capacity to offer and sustain culturally responsive services distribute educational material throughout the community to assist in de-stigmatization of service access establish cross-sector data sharing with partner agencies enhance discharge coordination for people in treatment and recovery expand peer workforce and community and target populations to learn about the Safe Rx and the Safe Communities Coalition project. The Safe Communities Coalition will continue to bridge the gap between social determinants of health and other systemic issues by collaboratively addressing health challenges of residents and serving communities with impactful solutions that establish linkages, promote and expand recovery communities, leverage shared resources, and coordinate care. The Safe Communities Coalition will leverage partnerships at the local/community, state, and regional levels, such as with rural counties and municipalities, Tribal governments, various agencies providing healthcare coverage, law enforcement, community recovery organizations, and faith-based organizations to expand and streamline the continuum of care for the region.

Clinical Outcomes Group, Inc (COGI)	Pottsville, PA
Panther Valley School District (PVSD)	Lansford , PA
St. Luke's Miners (SLM)	Coaldale, PA
Tamaqua Area School District (TASD)	Tamaqua, PA

Project Information:

Project Summary
<p>St. Luke's Hospital - Miners Campus (SLM) serves rural Coaldale, Pennsylvania, and both Schuylkill and Carbon Counties in Northeastern Pennsylvania. Through its community involvement and engagement, as well as Community Health Needs Assessments (CHNAs), SLM has identified that the target service area is at high risk for substance use disorder. The prevalence rate of opioid use disorder (OUD), opioid overdoses and opioid overdose mortality rates are all higher than national rates. Narcotics and over-the-counter drugs are used primarily by the community, including adolescents. Located in a rural, medically underserved</p>

St. Luke's Miners Memorial Hospital

area, population-to-provider ratios are worse than the state and US top performers. Stigma, transportation barriers, and cost of treatment prevent most from accessing treatment and recovery. Prevention efforts need to be enhanced to curb the swelling rate of SUD. Based on its planning and outreach efforts in the 2018 Rural Communities Opioid Response Program - Planning and the 2019 Rural Community Opioid Response Program - Implementation as well as the Western Rural CHNA June 2022, SLM has identified prevention and treatment resources and developed strategic and workforce plans to reduce SUD-associated morbidity and mortality. This SLM consortium includes Panther Valley and Tamaqua Area School Districts, the Tamaqua and Coaldale Head Start programs, and the Clinical Outcomes Group, Inc. (COGI).

Focus Areas

- Adolescent Health

Billy T. Cattan Recovery Outreach	Victoria, TX
Cuero Regional Hospital	Cuero, TX
Southeast Texas Health System	Weimar, TX
Texas A&M University College of Nursing	Bryan, TX

Project Information:

Project Summary

Golden Crescent Psychostimulant Support (GC-PS) responds to HRSA’s RCORP initiative to reduce morbidity and mortality related to substance use disorder in high-risk rural communities. The purpose of GC-PS is to further develop, advance, and extend SUD initiatives and resources for prevention, treatment, and recovery capital in rural areas of Texas with emphasis on psychostimulant use disorders, specifically methamphetamines. GC-PS will target community-voiced concerns about methamphetamine use and expand initiatives to counties surrounding the Golden Crescent counties (Figure 1). GC-PS project goals are to:

1. Strengthen SUD prevention activities with focus on individuals in the rural counties at risk for psychostimulant use disorder (particularly methamphetamines), their families, caregivers, and other community members through educational outreach.
2. Enhance treatment services and recovery capital through expansion of a community-engaged peer recovery support specialist (PRSS) program for rural residents diagnosed with or in treatment and/or recovery for SUD(s). Our HRSA RCORP-PS proposal leverages the strong foundation this collaborative has built. Over the past two years, we developed and begun implementing a strategic plan to increase recovery capital in the Golden Crescent, with focus on education on and access to screening, referral, treatment, and recovery resources. Our data indicate psychostimulant use is prevalent and recovery capital to address methamphetamine use is also critically needed. Our proposal expands current efforts to address specific education and treatment for stimulant use disorder and promote recovery using evidence-based and stigma-free interventions. TAMU CON will lead a Psychostimulant Support (PS) Consortium with Cuero Hospital, the SouthEast Texas Health System (SETHS), and BTCRO, who have capacity to meet project goals, supported by a robust PRSS Program. The PS Consortium has the expertise, collaborative ethic, and capacity to focus on strong community-voiced concern of methamphetamine use.

Focus Areas

- Health Literacy
- Peer Recovery

Areas of Expertise

Education

Areas Where We Would Like to Serve as a Peer Mentor

Moving a consortium to a Recovery Oriented System of Care (ROSC).

Areas Where We Would Welcome Technical Assistance

Enhancing peer services for cross-training within the community.

Project Information:

Project Summary
<p>United Way of the Wabash Valley, Inc. (UWWV) is a volunteer-led, non-profit organization in west central Indiana engaged in collective impact to address the root causes of key community issues. The Wabash Valley Substance Use Disorders Council Psychostimulant Support Consortium Project will work to directly address psychostimulant abuse/misuse, with a primary focus on methamphetamine, by implementing designated core activities in prevention, treatment, and recovery. Major activities include increased school-based prevention programming, life skills training, parenting skills training, cognitive behavioral therapy, and SBIRT training for rural service provider organizations. Increased recovery services will include the implementation of Recovery Café models and contingency management programs at new rural-based recovery residences, as well as increased use of smart-phone technology to expand the recovery eco-system and facilitate better referrals to treatment.</p>
